exclusively for
Pharmaceutical Industry

Crinnovative Designs is headed by S Shree Harsha, who completed his Graduation in Pharmacy from a premier institute of Bangalore University. He is associated with Pharmaceutical Industry since 1998. He has served many organisations in various hierarchy. He is exposed to many strategies and launches in marketing. With the experience of Pharmaceutical Marketing and passion towards the designing led to the foundation of Crinnovative Designs.

Designing

WHY VISUAL AID

Visual communication is communication through a visual aid and is described as the conveyance of ideas and information in forms that can be read or looked upon. It also explores the idea that a visual message accompanying text has a greater power to inform, educate, or persuade a person or audience.

Research shows that presentations which use visual support are more persuasive than ones which do not. Visual aids help listeners understand abstract concepts and allow complex data to be organized and reduced to make a point clearly and concisely. We are all visual communicators, remember, we all start as artist, for whom making visual stuff is natural.

Furthermore, effective visual support maintains listener interest and increases audience retention of the material being presented.
